

RECENT PUBLICATIONS

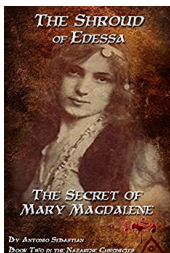

It has become increasingly easy to publish a book these days, but the collection that follows - all published since the last Newsletter - shows that is no more easy to write one, at least a worthwhile one, than it ever was. One or two seem to me of interest, but in general the fiction is unoriginal and badly written. Why do putative authors feel the need to write in the present tense? Although it lends a kind of spurious immediacy to a tale, it removes any sense of authority or consideration; I wish they wouldn't. The non-fiction, with one notable exception, is either a simple unquestioning resume of well-known evidence, or a flight of fancy based upon it. The reason I bring these books to your attention, however, is as ever to demonstrate that popular interest in the Shroud, at many levels, is alive and well, and the sindonology is not just an exclusive pursuit confined to a few academics in ivory towers. We need never feel that our own interest is unduly esoteric, or, in conversation, that "you've probably never heard of the Shroud of Turin." The 'blurbs' are heavily edited from those on Amazon.co.uk
